

Joseph A. DiPentino – Founder

January 23, 2010

Dear Investors:

First of all I would like to formally introduce myself and this company of incredible spirited people. Thank you for taking the time to note the accomplishments, energy and enthusiasm you will find herein. I am confident you will come to experience, see, feel and understand these incredible people of tomorrow. People that only need what your believing in a positive and loving world can bring. The current space provided them is small for their boundless energy, but the vision for their ability is endless. Imagine a whole world filled with the dream that is alive in this tiny space here and now. Imagine these spaces built by the ambition of youth who thought they were less than others and now realize they are far more. Then imagine them using this new found worth to perform and share their reasons for believing with ability they never imagined before. You seek jobs...my fellow leaders responsible for all the people of tomorrow...I now give you your jobs.

With several years in the corporate workforce and even longer as an entrepreneur, I have experienced a lifetime of highs and lows that have given me the understanding of every aspect of human ability and limitation. Most recently earned is a BS in aerospace science, aviation technology, FAA commercial pilot, multi-engine, instrument and advanced ground instructor pilot certificates, an MS degree in space systems operations, acquisitions and program management. Impressive you think? Not to me. Although these took an incredible amount of dedication and work, I have found that these accomplishments pale in comparison to those we as people have earned on the streets of hard learned wisdom and hard lived life. Wisdom forged from childhoods, lives and journeys that are reflected into that which will soon be shared with you through our many productions.

Come and prepare yourselves for a journey through not one but many lives and lifetimes on levels both physical and multi-dimensional. With the combined vision of these people and the limitless ability of the human spirit, these journeys will be shared, realized and understood. Words cannot express how thankful I am to be part of such a wonderful journey, so thankful that more than mere words shall now be used. Sight, sound, expression, body, mind and soul will convey to you what was a mystery to me and many others. These once young boys and girls traveling through this brief stage of physically manifested body in space and time, now mature men and women understanding their calling to share the insights necessary to fulfill life's true mission. Sharing with you each of their experiences of enlightenment they will convey the true meaning of what life is for. Some individually and some with other branches and leaves, these lights will express their revelations through the performing arts of these productions.

Coming to you now is for this reason. I am willing to do whatever is necessary to help these people, the vision that we have and this company of people as a whole succeed. While things are starting out I will continue to use my skills and ambition to help other companies and people succeed. When the right leaders come along they will see our potential and join with us to make all contributors more successful and fulfilled. Should it be my destiny, I will continue working with those leaders, creating even more successful relationships and prosperity for this planet and the spirit of humankind.

On behalf of all *Life* herein,

Truly,

*Your Best Investment*
